PRODUCT INFORMATION SHEET

Description:

Pli-Dek Deck Riser Plates are specifically designed for use with the Pli-Dek Waterproofing Systems to facilitate the installation of synthetic wood deck finishes. The Pli-Dek Deck Riser Plates are constructed of T304 grade Stainless Steel pre-drilled with .22 holes every .5 o.c. The Deck Riser Plates are provided in 3 or 4 heights.

ses:

Pli-Dek Stainless Steel Deck Riser Plates are specifically designed horizontal attachment of sleeper trusses for wood finishes such as Redwood, Trex Composite decking or equivalents. The plates are used to horizontally attach the synthetic wood finishes instead of a vertical fastener from above the sleeper installation that would result in penetration to the Pli-Dek Waterproof Deck Coating System.

Advantages:

- Ease of installation
- Cost effective
- o penetrations in the waterproofing system
- Wood finishes stay off the surface away from moisture.
- Provides a level deck surface while maintaining slope for drainage at the waterproofing layer.
- Can be used for elevated pads for wet bars, bbq grills and outdoor fire pits to prevent penetrations into the waterproofing system.

Instructions:

Availability:

Packaging:

Pli-Dek Deck Riser Plates are sold individually.
