

Interior/Exterior Applications:

The PD Texture Coat System is ideal for concrete pool areas, walkways, sidewalks, patios, and driveways. The PD Texture Coat system is also used for interior floors, stairs, and entryways.

Flexibility:

Use the PD Texture Coat System over new or existing concrete. Turn an old run-down slab into a beautiful floor. The PD Texture Coat system is excellent for reconstruction/tenant improvements.

Skid-Resistant:

The Finish Coat can be applied to create a non-skid surface. It has passed the ASTM C-1028-96 test for Static Coefficient of Friction.

Durability:

The durability of the PD Texture Coat System makes it appropriate for most any exterior application. The PD Texture Coat System holds up to pedestrian traffic as well as vehicular traffic.

Appearance:

Beauty is the overwhelming factor in the PD Texture Coat System. Enhance the value and appearance of your project by applying decorative concrete overlays to existing concrete and flooring. Use two-tone colors to create borders or other decorative designs.

Low Maintenance:

The PD Texture Coat System requires little maintenance. Most cleanings require only soap and water.

UV Resistant:

The PD Texture Coat System has excellent resistance to harmful ultraviolet rays.

Finish Options:

Pli-Dek offers twelve standard colors. The use of special colors, textures, and two-tone finishes give the PD Texture coat system a unique look and feel. Custom colors are available.
